Protected Lands **	

* Resources are represented by stars if the exact boundaries of the area are unknown.
** Protected Lands - Land protected from development through conservation easement, restrictions, or outright ownership by an organization or agency whose mission includes protecting land in perpetuity; more than 50% of area will remain undeveloped.

Base Data are from USGS 1:24,000 scale Digital Line Graphs, as archived in the GRANIT database. All base data were distributed by Comptek Systems Research Center, Durham, NH. Some new road features added by SNHPC with GPS. Protected Lands layer last updated 1993. Resources for Protection were primarily delineated during the Derry parcelling in the 1990s. Many areas were also identified by the Derry Conservation and Heritage Committee for the National Historic Landmarks program.

Digital data in NH GRANIT represent the effects of the cadastral mapping approach to map of information from the civil census materials. Comptek Systems Research Center (CSR), under contract to the Office of State Planning (OSP) and in cooperation with the State Geographic Information System (SGIS), maintains a continuing program to identify and correct errors in these data. Neither OSP nor SGIS make any claim as to the validity or reliability of any implied use of these data.
